GETTING STARTED

On Mobile: Download Novawallet or Subwallet, open the browser within the app, and navigate to flappywud.lol, or find FlappyWUD directly under games.

On PC: Connect with Talisman, Subwallet, or Polkadot.js wallets.

THE WUD MULTIPLIER

In Flappy Wud, your WUD tokens are more than just a meme coin—they are integral to enhancing your gameplay through score multipliers. The more WUD you hold in your connected wallet, the greater your score multiplier, giving you a significant advantage as you play.

The WUD Multiplier is a unique feature that enhances your score based on the amount of WUD tokens in your connected wallet.

HOW IT WORKS

Trigger Time: The WUD Multiplier can activate randomly at any score between 10 and 69.

Score Boost: Your points can be multiplied by 2x, 3x, or even 4x depending on your WUD holdings.

The more WUD you have, the longer the multiplier lasts, granting you supercharged scoring for an extended period (2 seconds per 100 million WUD for a max of 100 seconds).

100 million WUD guarantees a multiplier activation every game session.

CALCULATION DETAILS

Base Chance: The initial trigger chance is 20%.

Maximum Chance: The highest possible trigger chance is 80%.

Chance Increase: For every 100 million tokens, the chance increases by 12% (60% divided by 500 million tokens).

VALUE CALCULATION

Below 50 Million WUD: 2x multiplier.

50 Million to 500 Million WUD: 3x multiplier.

Above 500 Million WUD: 4x multiplier.

MULTIPLIER DURATION

Base Duration: The multiplier lasts for 10 seconds.

Extended Duration: For every 100 million WUD tokens, an additional 2 seconds is added to the duration for a max of 100 seconds.

POWER-UP DATA

INVINCIBILITY

Quantum SuperPosition is a powerful new ability in FlappyWUD 2.0, offering players a unique edge with a blend of invincibility and speed. Once activated, it grants you temporary immunity from in-game obstacles, so even if you collide with logs or go off-screen, you won't lose your life during its duration. While in this state, your gameplay speed doubles, adding an extra layer of excitement. The Diamond NFT holder can set the rarity and duration of this power-up for every player.

JAM

The Jam power-up in FlappyWUD 2.0 is a quick boost that lets you skip 5 logs instantly, allowing you to advance through the course with ease. When you collect Jam, it will automatically trigger, bypassing obstacles and increasing your score without the usual challenge of navigating logs.

KUSBOOST

The KusBoost power-up provides an even bigger jump, allowing you to skip 10 logs instantly. Like Jam, KusBoost automatically activates when collected, propelling you forward and helping you bypass obstacles while racking up points without the usual navigation.

WUD BEER

WUD Beer appears randomly after you pass 100 logs, the further you go, the higher the chance of activating this cutscene. Once triggered, WUD Beer grants you 25 seconds of invincibility, allowing you to smash through obstacles without dying—though you still need to avoid falling off the screen.

NFT COMPATIBILITY

The exclusive OG WUD BURN NFT Collection features 4 tiers: Diamond, Gold, Silver, and Bronze, each representing the loyalty and dedication of those who contributed to burning an incredible 219.3962 LP shares.
